PROFESSIONAL SUMMARY

Senior Data Engineer with over four years of experience managing complex, end-to-end data warehousing environments for enterprise clients. Proficient in extracting, cleaning and organizing large scale datasets using Oracle SQL, PL/SQL, and Python to drive strategic business decisions. Highly skilled in leveraging visualization tools like Power BI to analyse data, identify operational trends, and deliver actionable insights to stakeholders. Proven track record of collaborating with cross-functional teams to streamline data processes, ensure data integrity, and support robust reporting infrastructures. Active open-source contributor with deep familiarity with the Red Hat ecosystem and community-driven development methodologies.

TECHNICAL SKILLS

Database Technologies	Oracle SQL, PL/SQL, PostgreSQL, MySQL, Enterprise Data Warehousing
Programming & Scripting	Python, Go, Unix Shell Scripting
Data Analysis & Visualisation	Power BI
Tools & Cloud	Git, GitHub Actions, Azure DevOps, Docker

PROFESSIONAL EXPERIENCE

Birlasoft Limited ***Sep 2021 to Present***

Senior Data Engineer ***Apr 2024 to Present***

- Lead data integration and performance optimisation initiatives, improving reporting efficiency for business teams.
- Leverage Power BI to develop and support dynamic dashboards, analysing complex datasets to identify operational trends and deliver actionable insights to business stakeholders.
- Design and optimised complex database objects and automated data ingestion and transformation pipelines utilising Unix shell scripts, significantly reducing manual intervention and improving workflow reliability
- Partner directly with business stakeholders to translate complex requirements into efficient technical solutions, enabling faster reporting and analytics.

Data Engineer ***Oct 2022 to Apr 2024***

- Focused on building and maintaining robust database solutions to power enterprise-level reporting and analytics.
- Developed and optimized PL/SQL procedures, functions and packages to support evolving business requirements.
- Supported deployment and release activities through Azure DevOps, maintaining consistent version control.

Trainee Developer ***Sep 2021 to Oct 2022***

- Built a strong technical foundation in database design, ETL processes, and the end-to-end Data Warehouse lifecycle under the guidance of senior engineers.
- Assisted in designing and modifying fundamental database objects and Power BI dashboards.

Open Source - Fedora Project ***Apr 2024 to Present***

- Strengthened mission-critical Fedora Infrastructure services by delivering production-ready features, performance improvements and modernisation efforts across distributed systems used by millions of users worldwide.
- Improved schema and event consistency across messaging workflows, optimised data retrieval through materialised views and elevated software reliability with expanded test coverage and CI automation.

ACHIEVEMENT

Birlasoft Team Awesome Award - *for exemplary performance and strong demonstration of customer centricity*

EDUCATION

Bachelor of Engineering (B.E.) in *Electronics & Telecommunication* - Pune University – 2021 | CGPA: 8.37

CERTIFICATIONS

AZ-104 - *Microsoft Azure Administrator Associate*
